  <td align="left" style="padding: 0px; border: 0px;"><a href="local/ApplyNow.html" target="_blank"></a></td>
</tr>
```

New code:

```
<tr>
  <td>
    <table class="btn-table" role="presentation" border="0" cellpadding="0" cellspacing="0" align="left">
      <tr>

style="font-family: 'Mulish', Arial; font-size: 22px; line-height: 26px; color: #ffffff; text-decoration: none; display: inline-block;
font-weight: 700;">Apply Now</a>
        </td>

JPEG designing is different from HTML coding

- Your email client does not understand 'Mulish Black/Bold'. It only understands base font (Mulish/Arial).
- Hence, the font styles used while designing JPEG differ from the fonts required in the HTML
